

OTH 940: PROJECT DEVELOPMENT & DESIGN

In consultation with a faculty advisor, students will finalize their exploration of professional interest in an area of advanced practice related to their professional advancement and move on to develop their knowledge translation project. Students will thoroughly review evidence related to clinical practice, education, research, technology, leadership, administration, advocacy, or entrepreneur opportunities as well as explore resources and networks that contribute to the design and development of the individual knowledge translation project. The student's work in this course will result in a detailed project design that will effectively guide project implementation. In order to obtain faculty advisor approval for the project, the design must demonstrate that the project will include the synthesis and application of advanced knowledge and strategies for integrating evidence-based approaches into practice.

Credits: 3
