

## BIOL 265: HUMAN ANATOMY & PHYSIOLOGY II

This is the second course in a two-course sequence that will introduce students to the structure and function of the human body. This course will build off the material learned in Human Anatomy and Physiology I. The body systems that will be studied in this course will include the immune, lymphatic, cardiovascular, respiratory, digestive, urinary, and reproductive systems. Human development and pregnancy will also be studied.

**Credits:** 3

**Prerequisites:**

BIOL 264. Offered every spring.

**Department:** [Biology](#)
