

ABA 621: BEH SYS & CHNG MGMT

Behavior analysis is not constrained to the classroom or the treatment center. Wherever anyone goes, they are behaving. And engaging in work behavior is a socially significant response that is amenable to study in the behavioral sciences. This graduate course deals exclusively with the behavior of individuals and the interlocking behavioral systems produced by the interactions from the board room to the production floor. This course focuses on the field of Organizational Behavior Management and is a natural extension of the basic and advanced principles in behavior analysis directly into all workforce levels. This course is offered at the GR and UG level; students enrolled in GR level versions of this course will expect more readings and assignments and are held to higher expectations in terms of rigor and magnitude of expected output to demonstrate mastery.

Credits: 3

Prerequisites:

ABA 313 or 513

Department: Applied Behavior Analysis & Autism Studies
