

AERO 344: VIRTUAL REALITY T-6 FLIGHT SIM INSTRUCTION

II

This course is designed to reinforce and expand the concepts and skills introduced in AS 343. The course is flight-centric, and thus, will not focus on ground operations or the tactile mechanic of setting up the cockpit and flight instruments. Rather, it will focus on flight maneuvers as described in the AETCMAN 11-248 T-6 Primary Flying such as the breakout, area departures, stalls, and an introduction to instrument flight. Students that complete this course will be more prepared to attend UPT because they will possess greater knowledge of the flight characteristics and parameters of the T-6.

Credits: 1

Prerequisites:

AERO 343

or permission from Det 880 Commander.

Department: [Military Science](#)
