

## ABA 555: CONCEPTUAL ANALYSIS

This course addresses the epistemological and philosophical frameworks that contributed to the development of the science of behavior analysis and the field of Applied Behavior Analysis. Students will learn about how to describe behavior from a Radical Behaviorism perspective and ask scientific behavioral questions and apply the science in the context of Applied Behavior Analysis. Further interpretations of behavior will subsequently be contrasted with the traditional behavioral perspective.

**Credits:** 3

**Prerequisites:**

ABA 543
