

HSCI 321: Applied Biostatistics (Q)

Health science professionals must be able to critically assess, design, conduct, and implement health research. This course is designed to apply basic statistical concepts and quantitative methods to solve real-life problems in health sciences. The primary goal of the course is to develop the thoughtful, reflective and critical thinking skills necessary to understand and assess research as well as perform and interpret statistical analyses of health science research.

Credits: 3
