

PHYS 100: EXPLORING THE PHYSICAL WORLD (NQ)

This is a course for students who like to learn by doing: hands-on activities linking core chemistry and physics principles to the real-world are emphasized. The objectives of the course are to give an appreciation of the process and content of physical science and to provide experience in learning by the inquiry method Cross listed as CHEM 100. Fall yearly.

Credits: 3

Department: [Physics](#)
