

PSYC 212: COGNITION/COGNITIVE NEUROSCIENCE(R)

An examination of the operations of the human mind, as well as the neural processes that support the mind. Classic cognitive findings are integrated with current research methods to more fully explore the link between mind and brain. Topics covered include the nature of consciousness, attention, memory, motor control, language, emotion, problem solving, and cognitive control. Emphasis is placed on critical thinking and current methodological approaches. Offered Fall semester.

Credits: 3

Prerequisites:

PSYC101 or BIOL111

Department: [Psychology](#)
