

ABA 534: ABA ETHICS/PROFESSIONAL STANDARD II

This 15-hour course is designed to address advanced exploration of ethics and professional standards, as applicable in the profession of applied behavior analysis. This class emphasizes the skills from section E of the Fifth Edition Task List of the Behavior Analysis Certification Board©, building on content from ABA 517. It will explore additional case studies and ask students to reflect on how they might handle situations they may encounter in the profession. Dilemmas of increasing difficulty will be presented for consideration and debate. Students will reflect on the immense power and responsibility that behavior analysts hold with the knowledge that they have regarding changing (manipulating) human behavior.
