

## ABA 535: ADV CONCEPTS & PRINCIPLES OF ABA

This graduate course addresses advanced concepts and principles of applied behavior analysis, building on content from ABA 513. Students will review more complex examples of these principles and demonstrate their understanding both receptively and expressively. Students will enhance their competence in the history, philosophy, and interpretation of core behavior analytic principles.

**Credits:** 3

**Prerequisites:**

Prerequisite: ABA 313 or 513

**Department:** Applied Behavior Analysis & Autism Studies
